

Optimum Value Medication List

Medications that offer the best value

Are you on a medication to prevent or manage a health condition?

The medications listed on this flyer can help prevent many illnesses and conditions for people who have risk factors.

If your medication is on this list, your prescription benefit helps you save money and stay on your treatment plan. Under some plans, you may not need to pay a copay, coinsurance and/or deductible for the medications on this list.

Be sure to follow your doctor's treatment plan – including taking prescribed medications as directed – to help you live a healthier life today and possibly avoid serious illness and high health care costs down the road.
