CONFIDENTIALITY OF DATA

Banner accesses data stored in the **Salt Lake Community College (SLCC)** administrative database. Some of that data is protected by privacy laws and should only be accessed within the parameters of job requirements. Upon logging in to Banner, an individual's username sets data access restrictions. However, confidentiality of data should always be paramount in the mind of Banner users. In addition, federal law dictates what student data can be released to outside entities. **FERPA** (Family Educational Rights and Privacy Act) is a federal law that establishes student information privacy: what can legally be released, and under what conditions. A prerequisite for access to Banner is to successfully complete FERPA training. You can register for this training by going to MySLCC and selecting the Employee Training channel. This training teaches Banner users what and when data may be released according to FERPA. For further information about FERPA contact the **SLCC** Registrar Office, 957-4799.

MANAGING BUDGETS USING BANNER FORMS

PRIMARY BANNER FORMS USED

There are primarily five Banner forms used to manage an organization's budget. The table below lists these forms along with their general description and a brief explanation of function or use.

Form Name	General Description	Function or Use
FGIBSUM	Organization Budget Summary	High level summary by four account types: revenue, labor, expenditure, and transfer.
FGIBAVL	Budget Availability Status	Summary of budget, activity, commitments, and available balance categorized by budget account.
FGIBDST	Organization Budget Status	Summary of budget, activity, commitments, and available balance categorized by account code.
FGITRND	Detail Transaction Activity	Detailed transaction activity by account code. within entered parameters.
FGITBAL	General Ledger Trial Balance	Trial balance by fund. Commonly used to verify carry forward amounts when setting up new year budgets.

BUDGET REPORTS

The following tables describe the **Parameter Values** that should be entered for three budget reports:

- FGRBDSC Budget Status (Current Period) Report
- FGRODTA Organization Detail Activity Report

An example of each report follows the **Parameter Value** table.

FGRBDSC - BUDGET STATUS (CURRENT PERIOD) REPORT

Description: This page is a report version of the information from the FGIBDST banner screen. This report is sorted by account for the entered parameters. The report displays:

- adjusted budget
- current and year-to-date activity •
- budget commitments
- available balance for each account

REPORT PRINTING TIPS

- To pull the data for a particular month use the first and last day of that month in the from date and to date parameter fields.
- To pull the data for a particular fiscal year use the first and last day of that fiscal year (or the last day of the month to pull YTD activity) in the *from date* and *to date* parameter fields.
- If the actual report date is prior to the end of the month:
 - the ending date in the report heading in Word (or after the report is printed) should be changed to the actual report date
 - this is to correct the heading date to match the time period covered in the report
- Year end reports printing procedures:
 - Run prior fiscal year reports well after June 30th
 - Business Office continues to post transactions and adjustments to Banner indexes until closeout.
 - Final closeout occurs after the annual audit in late summer
 - When generating a report after June 30th for the **prior** fiscal year:
 - put a Y in the Include Accrual for last Period parameter field
 - causes report to include post year-end adjustments and to reflect final prior fiscal year balances
 - Ensure that the **To Date** parameter is **June 30**, **20XX** (the last day of the fiscal year).

APPENDIX A: INDEX CODE LOGIC

This appendix details the logic behind **Index Codes**. Index Codes simplify accounting. Each **Index Code equals** a default: **Fund**, **Organization**, and **Program Code**. There are two types of Index Codes:

- a six character Alpha code for General Fund (hard funded) Indexes
- a five digit Numeric code for Revenue (soft funded) Indexes

BASIC RULES:

GENERAL FUND INDEXES (HARD FUNDED INDEXES)

• Rule: The Index Code matches the 6 letter Organization Code.

Example:	Organization Code	Index Code
Academic Computing	IIADCM	IIADCM

REVENUE INDEXES (SOFT FUNDED INDEXES)

• Rule: The Index Code matches the 5 digit Fund Code.

Example:	Fund Code	Index Code
seog	20311	20311

• **Exception:** Where one **Fund** or **revenue** source has sub funds, the **Index Code** is based on a sequential number series starting with the related 5 digit Fund Code.

Example:	Fund Code	Index Code
Grand Theatre Control	16000	16000
Production #1	16000	16001
Production #2	16000	16002
Production #3	16000	16003

APPENDIX B: ACCOUNT CODE LOGIC

Type of Code	Sequence	Account Type
	1XXXX	Assets
	2XXXX	Liabilities
	3XXXX	Control Accounts
	4XXXX	Fund Balance/Equity Accounts
R	5XXXX	Revenue Accounts
L	60XXX	Salaries
L	61XXX	Hourly Teaching
L	62XXX	Hourly Non-Teaching
L	65XXX	Salaried Benefits
L	66XXX	Hourly Benefits
E	7XXXX	Current Expense
Т	8XXXX	Transfers In and Out
E	90XXX	Travel
E	94XXX	Plant Fund Capital Expenditures
E	96XXX	Budget Hold
E	99XXX	Indirect Costs

The following table explains the logic for generating Account Codes.

- R = Revenue
- L = Labor
- E = Expenditure
- T = Transfer

APPENDIX D: TRANSACTION TYPES AND DOCUMENT NUMBER DEFINITIONS

Commonly Encountered Transaction Types

When an invoice pays against an encumbrance (indicated by the INEI type), banner will show two transaction lines for the payment. One transaction will reference ENC in the field column, and the other will reference YTD. The ENC transaction indicates changes to the encumbrance, while the YTD transaction indicates changes to the YTD activity. When an invoice pays against a purchase order, the ENC transaction decreases the encumbrance balance while the YTD transaction increases the year-to-date expenses.

APPENDIX E: CREATING MACROS IN WORD 365

WHAT IS A MACRO?

A **Macro** automates a task performed repeatedly or on a regular basis. For example, a series of commands and actions (Mouse clicks and key strokes) to format a report can be recorded and run to repeat the formatting. As you format the report, series of commands and actions are recorded and saved as a Macro. The **Macro** then is run to automatically repeat the recorded series of commands and actions.

In the case of Banner reports, after opening a report in Word, record and save formatting commands as a **Macro**. Using this **Macro**, future reports format exactly the same way, automatically.

Tip: The most important step in creating a **Macro** is careful planning. For example, determining the formatting steps of a report prior to recording the **Macro**.

Now follow these steps to format the report for printing:

- Press Ctrl + A to select all of the report.
- On the Home tab, Font group, change the font to Courier New.
- Change the Font size to 8.
- On the Page Layout tab, Page Setup group select margins and set Narrow (1/2 inch margins.
- In the same group select orientation and click on Landscape
- The report is now ready for printing.
