

# NOW HIRING

Millions each year visit Utah for unparalleled skiing and outdoor activities. The state's Rocky Mountain hiking and biking trails, red rock country and vast national parks are year-round destinations. A thriving tech industry and one of the best economies in the nation, combined with varied cultural, educational and research opportunities, make Utah a great place to live, work and play.

As more people have discovered Utah for its natural beauty, economic vitality and nationally recognized educational offerings, the state's diversity has increased. Salt Lake Community College reflects that demographic change with the most diverse student body of any college or university in the state.

Once at SLCC, employees benefit from competitive wages and an outstanding overall compensation package: including medical, dental, retirement, community engagement leave time, tuition reimbursement and more.

Few institutions in Utah have a more significant impact on the state's economy, workforce and education pipeline than Salt Lake Community College, which teaches and trains more than 60,000 students in more than 100 areas of study each year.
