

YOUR BENEFITS COVER MDLIVE VIRTUAL DOCTOR VISITS.

YOUR FIRST LINE OF DEFENSE AGAINST COLD, FLU & COVID-19.

This winter, the cold, flu and COVID-19 will likely continue to spread. Using MDLIVE virtual visits give you and your family access to fast, proven, safe and accurate healthcare — from the safety and comfort of home.

MDLIVE doctors are available 24/7 for virtual appointments — from diagnosis and treatment to prescriptions, all in one call that you can make any time and from anywhere.

When symptoms hit, early treatment and talking with a doctor is essential. And treatment options for the flu are more effective if symptoms are caught early — often lessening the severity and downtime. This season use MDLIVE as your first line of defense.

“This service is amazing. It’s so quick and easy. I am so grateful to get medical care without the risk of getting COVID. Wonderful service!”

— Genny, Texas

USE YOUR VIRTUAL VISIT BENEFIT.

SAFE ALTERNATIVE TO URGENT CARE CLINICS

Avoid waiting room germs and higher costs of Urgent Care Clinics.

AVAILABLE 24/7

Talk with a doctor in 15 minutes* by phone or video, 24/7, even weekends and holidays.
