

Salt Lake Community College

Access to Safety Data Sheets

Salt Lake Community College (SLCC) has access to an online safety data sheet (SDS) computer system from Vector Solutions. It is called “Vector SDS and Chemical Management” and allows all SLCC students, faculty and staff access to the safety data sheets for all chemicals used and stored at the various SLCC campuses.

Safety Data Sheets provide information on the properties of each chemical, the physical, health, and environmental health hazards, protective measures, and safety precautions for handling, storing, and transporting the chemical.

Any student, staff or facility member can also access the SLCC Vector SDS and Chemical Management website by entering this internet address (<http://slcc-ut.newlook.safecollegessds.com/location/view/30aeaf73-5402-40cf-9b44-9dd7e8d2144d>) into the Browser on a computer. The SDSs are sorted by Campus name or by a Facilities group. You can then drill down deeper to a specific room to see a list of the chemicals in that room. If you so desire, you can then click on the “calendar” symbol below the product or chemical name which will take you to a summary of the chemical. In the upper right-hand corner of that screen there is a “Download SDS” button. If you click on this button you can download a PDF copy of the SDS.

Additionally, there are posters throughout the college with a QR code. This QR code is a link to SLCC Vector SDS and Chemical Management site. Using a smart phone any student, staff or facility member can scan the QR code and then access the SDSs for SLCC. You can also view this QR code below.
